Volume 33 (2000)

Volume 33 Number 1 **January 2000**

Editorial

F. Guilak, M. Sato, C. M. Stanford and R. A. Brand — 1 **Cell Mechanics**

Review Papers

T. D. Brown — 3 **Techniques for mechanical stimulation of cells in vitro: a review**

R. M. Hochmuth — 15 **Micropipette aspiration of living cells**

C. Zhu — 23 **Kinetics and mechanics of cell adhesion**

General Papers

C. Dong and X. X. Lei — 35 **Biomechanics of cell rolling: shear flow, cell-surface adhesion, and cell deformability**

D. Kaspar, W. Seidl, C. Neidlinger-Wilke, A. Ignatius and L. Claes — 45 **Dynamic cell stretching increases human osteoblast proliferation and CICP synthesis but decreases osteocalcin synthesis and alkaline phosphatase activity**

M. Joldersma, E. H. Burger, C. M. Semeins and J. Klein-Nulend — 53 **Mechanical stress induces COX-2 mRNA expression in bone cells from elderly women**

C. M. Stanford, F. Welsch, N. Kastner, G. Thomas, R. Zaharias, K. Holtman and R.A. Brand — 63 **Primary human bone cultures from older patients do not respond at continuum levels of in vivo strain magnitudes**

C. T. Hung, D. Ross Henshaw, C.-B. Wang, R. L. Mauck, F. Raia, G. Palmer, P.-H. Grace Chao, V.C. Mow, A. Ratcliffe and W. B. Valhmu — 73 **Mitogen-activated protein kinase signaling in bovine articular chondrocytes in response to fluid flow does not require calcium mobilization**

D. A. Lee, M. M. Knight, J. F. Bolton, B. D. Idowu, M.V. Kayser and D. L. Bader — 81 **Chondrocyte deformation within compressed agarose constructs at the cellular and sub-cellular levels**

H. Miyazaki, Y. Hasegawa and K. Hayashi — 97 **A newly designed tensile tester for cells and its application to fibroblasts**

Y. Cheng, C. A. Hartemink, J. H. Hartwig and C. Forbes Dewey Jr. — 105 **Three-dimensional reconstruction of the actin cytoskeleton from stereo images**

T. Yamaguchi, Y. Yamamoto and H. Liu — 115 **Computational mechanical model studies on the spontaneous emergent morphogenesis of the cultured endothelial cells**

M. Sato, K. Nagayama, N. Kataoka, M. Sasaki and K. Hane — 127 **Local mechanical properties measured by atomic force microscopy for cultured bovine endothelial cells exposed to shear stress**

Volume 33 Number 2 **February 2000**

R. Botnar, G. Rappitsch, M. Beat Scheidegger, D. Liepsch, K. Perktold and P. Boesiger — 137 **Hemodynamics in the carotid artery bifurcation: a comparison between numerical simulations and in vitro MRI measurements**

L.Q. Zhang and G.W. Nuber 145 **Moment distribution among human elbow extensor muscles during isometric and submaximal extension**

R.R. Neptune, S.A. Kautz and F.E. Zajac 155 **Muscle contributions to specific biomechanical functions do not change in forward versus backward pedaling**

R.R. Neptune and W. Herzog 165 **Adaptation of muscle coordination to altered task mechanics during steady-state cycling**

A.P. Marsh, P. E. Martin and D.J. Sanderson 173 **Is a joint moment-based cost function associated with preferred cycling cadence?**

J. Ivarsson, D.C. Viano, P. Lövsund and B. Aldman 181 **Strain relief from the cerebral ventricles during head impact: experimental studies on natural protection of the brain**

R.W. Nightingale, D.L. Camacho, A. J. Armstrong, J.J. Robinette and B.S. Myers 191 **Inertial properties and loading rates affect buckling modes and injury mechanisms in the cervical spine**

Techinical note

Z.B. Gao, S. Pandya, N. Hosein, M.S. Sacks and N.H.C. Hwang 199 **Bioprosthetic heart valve leaflet motion monitored by dual camera stereo photogrammetry**

J.H. Keyak and S.A. Rossi 209 **Prediction of femoral fracture load using finite element models: an examination of stress- and strain-based failure theories**

M. Ito, H. Akima and T. Fukunaga 215 **In vivo moment arm determination using B-mode ultrasonography**

W. Liu and B.M. Nigg 219 **A mechanical model to determine the influence of masses and mass distribution on the impact force during running**

R.E. Hughes 225 **Effect of optimization criterion on spinal force estimates during asymmetric lifting**

M.J. Silva and S.R. Ulrich 231 **In vitro sodium fluoride exposure decreases torsional and bending strength and increases ductility of mouse femora**

M.C. Tsili 235 **Theoretical solutions for internal bone remodeling of diaphyseal shafts using adaptive elasticity theory**

D. Hawkins 241 **A new instrumentation system for training rowers**

M.L. Knothe Tate and U. Knothe 247 **An ex vivo model to study transport processes and fluid flow in loaded bone**

G.T. Charras and R.E. Guldberg 255 **Improving the local solution accuracy of large-scale digital image-based finite element analyses**

261 **Letter to the Editor**

263 **Author's Response**

205 **Book review**

Volume 33 Number 3 **March 2000**

B. De Wit, D. De Clercq and P. Aerts 269 **Biomechanical analysis of the stance phase during barefoot and shod running**

L. Cristofolini and M. Viceconti 279 **Mechanical validation of whole bone composite tibia models**

M. Stenström, B. Olander, D. Lehto-Axtelius, J.E. Madsen, L. Nordsletten and G.A. Carlsson 289 **Bone mineral density and bone structure parameters as predictors of bone strength: an analysis using computerized microtomography and gastrectomy-induced osteopenia in the rat**

P. Segers and P. Verdonck 299 **Role of tapering in aortic wave reflection: hydraulic and mathematical model study**

M. Beek, J.H. Koolstra, L.J. van Ruijven and T.M.G.J. van Eijden 307 **Three-dimensional finite element analysis of the human temporomandibular joint disc**

S.P. Fritton, K. J. McLeod and C.T. Rubin 317 **Quantifying the strain history of bone: spatial uniformity and self-similarity of low-magnitude strains**

I.A. Anderson and J.B. Carman 327 **How do changes to plate thickness, length, and face-connectivity affect femoral cancellous bone's density and surface area? An investigation using regular cellular models**

G.C. Reilly and J.D. Currey 337 **The effects of damage and microcracking on the impact strength of bone**

J.E. Novotny, B.D. Beynnon and C.E. Nichols 345 **Modeling the stability of the human glenohumeral joint during external rotation**

J.-B. Zhang and Z.-B. Kuang 355 **Study on blood constitutive parameters in different blood constitutive equations**

Technical notes

E.K.J. Chadwick, A.C. Nicol, S. Floyd and T.G.F. Gray 361 **A telemetry-based device to determine the force–displacement behaviour of materials in high impact loading situations**

K. Miller 367 **Constitutive modelling of abdominal organs**

C.N. Maganaris 375 **In vivo measurement-based estimations of the moment arm in the human tibialis anterior muscle–tendon unit**

R.V. Baratta, M. Solomonow, G. Nguyen and R. D'Ambrosia 381 **Characterization of load–length–velocity relationships of nine different skeletal muscles**

Y.-C. Pai, B.E. Maki, K. Iqbal, W.E. McIlroy and S.D. Perry 387 **Thresholds for step initiation induced by support-surface translation: a dynamic center-of-mass model provides much better prediction than a static model**

Letter to the editor

H. Hatze 393 **Comments on 'A multi-phase optimal control technique for the simulation of a human vertical jump'**

Volume 33 Number 4 **April 2000**

F. Cassot, M. Zagzoule and J.-P. Marc-Vergnes 395 **Hemodynamic role of the circle of Willis in stenoses of internal carotid arteries. An analytical solution of a linear model**

D.M. Stump, P.J. Watson and W.B. Fraser 407 **Mathematical modelling of interwound DNA supercoils**

T.N. Gardner, T. Stoll, L. Marks, S. Mishra and M. Knothe Tate — 415 **The influence of mechanical stimulus on the pattern of tissue differentiation in a long bone fracture — an FEM study**

C. Orizio, R.V. Baratta, B. He Zhou, M. Solomonow and A. Veicsteinas — 427 **Force and surface mechanomyogram frequency responses in CAT gastrocnemius**

A.-C. Godest, C. Simonis de Cloke, M. Taylor, P.J. Gregson, A.J. Keane, S. Sathasivan and P.S. Walker — 435 **A computational model for the prediction of total knee replacement kinematics in the sagittal plane**

J.S. Stroud, S.A. Berger and D. Saloner — 443 **Influence of stenosis morphology on flow through severely stenotic vessels: implications for plaque rupture**

A. Arampatzis, A. Knicker, V. Metzler and G.-P. Briiggemann — 457 **Mechanical power in running: a comparison of different approaches**

D.R. Wilson, J.D. Feikes, A.B. Zavatsky and J.J. O'Connor — 465 **The components of passive knee movement are coupled to flexion angle**

M.L. Raghavan and D.A. Vorp — 475 **Toward a biomechanical tool to evaluate rupture potential of abdominal aortic aneurysm: identification of a finite strain constitutive model and evaluation of its applicability**

Technical notes

Y.-N. Wang, C. Galiotis and D.L. Bader — 483 **Determination of molecular changes in soft tissues under strain using laser Raman microscopy**

A.M. Weinberg, I.T. Pietsch, M.B. Helm, J. Hesselbach and H. Tscherne — 487 **A new kinematic model of pro- and supination of the human forearm**

X. Yuan and L. Ryd — 493 **Accuracy analysis for RSA: a computer simulation study on 3D marker reconstruction**

J.H. Keyak — 499 **Relationships between femoral fracture loads for two load configurations**

P.H.F. Nicholson, R. Strelitzki, R.O. Clevel and M.L. Bouxsein — 503 **Scattering of ultrasound in cancellous bone: predictions from a theoretical model**

507 Letter to the Editor

509 Authors' response

511 Announcement

Volume 33 Number 5 **May 2000**

I.C. Wright, R.R. Neptune, A.J. van den Bogert and B.M. Nigg — 513 **The influence of foot positioning on ankle sprains**

G. Cacciola, G.W.M. Peters and P.J.G. Schreurs — 521 **A three-dimensional mechanical analysis of a stentless fibre-reinforced aortic valve prosthesis**

W. Herzog and T.R. Leonard — 531 **The history dependence of force production in mammalian skeletal muscle following stretch-shortening and shortening-stretch cycles**

W. Wang — 543 **A critical parameter for transcapillary exchange of small solutes in countercurrent systems**

F. Migliavacca, G. Dubini, G. Pennati, R. Pietrabissa, R. Fumero, T.-Y. Hsia and M.R. de Leval — 549 **Computational model of the fluid dynamics in systemic-to-pulmonary shunts**

H. Tohyama and K. Yasuda — 559 **The effects of stress enhancement on the extracellular matrix and fibroblasts in the patellar tendon**

G. Giakas, L.K. Stergioulas and A. Vourdas — 567 **Time-frequency analysis and filtering of kinematic signals with impacts using the Wigner function: accurate estimation of the second derivative**

J.R. Meakin and D.W.L. Hukins — 575 **Effect of removing the nucleus pulposus on the deformation of the annulus fibrosus during compression of the intervertebral disc**

P. Ferris and P.J. Prendergast — 581 **Middle-ear dynamics before and after ossicular replacement**

E.K.J. Chadwick and A.C. Nicol — 591 **Elbow and wrist joint contact forces during occupational pick and place activities**

J.W. Chow, T.A. Millikan, L.G. Carlton, W.-s. Chae and M.I. Morse — 601 **Effect of resistance load on biomechanical characteristics of racing wheelchair propulsion over a roller system**

H. Graichen, T. Stammberger, H. Bonel, K.-H. Englmeier, M. Reiser, F. Eckstein — 609 **Glenohumeral translation during active and passive elevation of the shoulder — a 3D open-MRI study**

C.E. Miller and C.L. Wong — 615 **Trabeculated embryonic myocardium shows rapid stress relaxation and non-quasi-linear viscoelastic behavior**

Technical notes

D.A. Steinman — 623 **Simulated pathline visualization of computed periodic blood flow patterns**

J.H.-C. Wang, J. Ryu, J.-S. Han and B. Rowen — 629 **A new method for the representation of articular surfaces using the influence surface theory of plates**

J.A. Johnson, D.A. Rath, C.E. Dunning, S.E. Roth and G.J.W. King — 635 **Simulation of elbow and forearm motion in vitro using a load controlled testing apparatus**

641 **Erratum**

643 **Announcement**

Volume 33 Number 6 **June 2000**

J.E. Bischoff, E.M. Arruda and K. Grosh — 645 **Finite element modeling of human skin using an isotropic, nonlinear elastic constitutive model**

G. Cacciola, G.W.M. Peters and F.P.T. Baaijens — 653 **A synthetic fiber-reinforced stentless heart valve**

W. Herzog, T.R. Leonard and J.Z. Wu — 659 **The relationship between force depression following shortening and mechanical work in skeletal muscle**

J.S. Jurvelin, J.P. Arokoski, E.B. Hunziker and H.J. Helminen — 669 **Topographical variation of the elastic properties of articular cartilage in the canine knee**

B. Diebold, A. Delouche, A. Decesare, P. Delouche, J.-P. Guglielmi and A. Herment — 677 **Fluid mechanics of regurgitant jets and calculation of the effective regurgitant orifice in free or complex configurations**

J.-C. Sarron, C. Blondeau, A. Guillaume and D. Osmont — 685 **Identification of linear viscoelastic constitutive models**

D.L. van Deursena, M. Lengsfeld, C.J. Snijders, J.J.M. Evers and R.H.M. Goossens — 695 **Mechanical effects of continuous passive motion on the lumbar spine in seating**

M. Grigioni, C. Daniele, G. D'Avenio and V. Barbaro — 701 **On the monodimensional approach to the estimation of the highest Reynolds shear stress in a turbulent flow**

G. Karner and K. Perktold — 709 **Effect of endothelial injury and increased blood pressure on albumin accumulation in the arterial wall: a numerical study**

T. Shipkowitz, V.G.J. Rodgers, L.J. Frazin and K.B. Chandran — 717 **Numerical study on the effect of secondary flow in the human aorta on local shear stresses in abdominal aortic branches**

J.H.-C. Wang, E.S. Grood, J. Florer and R. Wenstrup — 729 **Alignment and proliferation of MC3T3-E1 osteoblasts in microgrooved silicone substrata subjected to cyclic stretching**

I.A.F. Stokes and M.G. Gardner-Morse — 737 **Strategies used to stabilize the elbow joint challenged by inverted pendulum loading**

Technical notes

N. Yoganandan, F.A. Pintar and R. Seipel — 745 **Experimental production of extra- and intra-articular fractures of the os calcis**

C.S. Howard, D.C. Blakeney, J. Medige, O.J. Moy and C.A. Peimer — 751 **Functional assessment in the rat by ground reaction forces**

S.W.S. Gussekloo, B.A.M. Janssen, M.G. Vosselman and R.G. Bout — 759 **A single camera roentgen stereophotogrammetry method for static displacement analysis**

J.T. Lysack, J.P. Dickey, G.A. Dumas and D. Yen — 765 **A continuous pure moment loading apparatus for biomechanical testing of multi-segment spine specimens**

M.L. Kaplan and J.H. Heegaard — 771 **Energy-conserving impact algorithm for the heel-strike phase of gait**

X. Zhang, M.A. Nussbaum and D.B. Chaffin — 777 **Back lift versus leg lift: an index and visualization of dynamic lifting strategies**

A. Hreljac and R.N. Marshall — 783 **Algorithms to determine event timing during normal walking using kinematic data**

787 **Letter to the editor**

789 **Authors' response**

791 **Erratum**

793 **Bulletin**

Volume 33 Number 7 **July 2000**

M. Fritz — 795 **Simulating the response of a standing operator to vibration stress by means of a biomechanical model**

R. A. Brady, M. J. Pavol, T. M. Owings and M. D. Grabiner — 803 **Foot displacement but not velocity predict the outcome of a slip induced in young subjects while walking**

H. Weinans, D. R. Sumner, R. Igloria and R. N. Natarajan 809 **Sensitivity of periprosthetic stress-shielding to load and the bone density–modulus relationship in subject-specific finite element models**

F. Eckstein, B. Lemberger, T. Stammberger, K. H. Englmeier and M. Reiser 819 **Patellar cartilage deformation in vivo after static versus dynamic loading**

B.-H. Zhou, R.V0. Baratta, M. Solomonow, M. Zhu and Y. Lu 827 **Closed-loop control of muscle length through motor unit recruitment in load-moving conditions**

P. L. Cheng, A. C. Nicol and J. P. Paul 837 **Determination of axial rotation angles of limb segments — a new method**

G. Wayne Brodland and H. H. Chen 845 **The mechanics of cell sorting and envelopment**

R. C. Wagenaar and R. E. A van Emmerik 853 **Resonant frequencies of arms and legs identify different walking patterns**

S. N. Robinovitch, J. Chiu, R. Sandler and Q. Liu 863 **Impact severity in self-initiated sits and falls associates with center-of-gravity excursion during descent**

W. Liu and M. E. Maitland 871 **The effect of hamstring muscle compensation for anterior laxity in the ACL-deficient knee during gait**

I. Sevostianov and M. Kachanov 881 **Impact of the porous microstructure on the overall elastic properties of the osteonal cortical bone**

Technical notes

B. C. Fleming, G. D. Peura and B. D. Beynnon 889 **Factors influencing the output of an implantable force transducer**

S. G. Zachariah and J. E. Sanders 895 **Finite element estimates of interface stress in the trans-tibial prosthesis using gap elements are different from those using automated contact**

Y. Y. Dhaher, S. L. Delp and W. Z. Rymer 901 **The use of basis functions in modelling joint articular surfaces: application to the knee joint**

909 **Announcement**

I **Index**

Volume 33 Number 8 **August 2000**

J. A. Vilensky and J. A. Cook 911 **Do quadrupeds require a change in trunk posture to walk backward?**

H.-D. Lee, E. Suter and W. Herzog 917 **Effects of speed and distance of muscle shortening on force depression during voluntary contractions**

M. Suzuki, Y. Yamazaki and K. Matsunami 925 **Simplified dynamics model of planar two-joint arm movements**

N. J. Mansfield and M. J. Griffin 933 **Non-linearities in apparent mass and transmissibility during exposure to whole-body vertical vibration**

W. M. Murray, T. S. Buchanan and S. L. Delp 943 **The isometric functional capacity of muscles that cross the elbow**

S. J. Ferguson, J. T. Bryant, R. Ganz and K. Ito 953 **The influence of the acetabular labrum on hip joint cartilage consolidation: a poroelastic finite element model**

Ch. Ament and E. P. Hofer 961 **A fuzzy logic model of fracture healing**

J. C. Martin, N. A. Brown, F. C. Anderson and W. W. Spirduso 969 **A governing relationship for repetitive muscular contraction**

S. Z. Zhao, X. Y. Xu, A. D. Hughes, S. A. Thom, A. V. Stanton, B. Ariff and Q. Long 975 **Blood flow and vessel mechanics in a physiologically realistic model of a human carotid arterial bifurcation**

E. V. Biryukova, A. Roby-Brami, A. A. Frolov and M. Mokhtari 985 **Kinematics of human arm reconstructed from spatial tracking system recordings**

A. J. Ward-Smith and P. F. Radford 997 **Investigation of the kinetics of anaerobic metabolism by analysis of the performance of elite sprinters**

B. Couteau, Y. Payan and S. Lavallée 1005 **The mesh-matching algorithm: an automatic 3D mesh generator for finite element structures**

C. Bertolotti and V. Deplano 1011 **Three-dimensional numerical simulations of flow through a stenosed coronary bypass**

L. J. van Ruijven, M. Beek, E. Donker and T. M. G. J. van Eijden 1023 **The accuracy of joint surface models constructed from data obtained with an electromagnetic tracking device**

Technical notes

S. J. Piazza and P. R. Cavanagh 1029 **Measurement of the screw-home motion of the knee is sensitive to errors in axis alignment**

M. E. T. Willems and W. T. Stauber 1035 **Force output during and following active stretches of rat plantar flexor muscles: effect of velocity of ankle rotation**

J. S. Day, D. J. Murdoch and G. A. Dumas 1039 **Calibration of position and angular data from a magnetic tracking device**

Book review

Maury A. Nussbaum 1047 **Talking Nets — An Oral History of Neural Networks by James A. Anderson and Edward Rosenfeld**

Volume 33 Number 9 **September 2000**

M. Wong, M. Ponticiello, V. Kovanen and J. S. Jurvelin 1049 **Volumetric changes of articular cartilage during stress relaxation in unconfined compression**

N. K. Fowler and A. C. Nicol 1055 **Interphalangeal joint and tendon forces: normal model and biomechanical consequences of surgical reconstruction**

A. R. Karduna, P. W. McClure and L. A. Michener 1063 **Scapular kinematics: effects of altering the Euler angle sequence of rotations**

S. Hirokawa and R. Tsuruno 1069 **Three-dimensional deformation and stress distribution in an analytical/computational model of the anterior cruciate ligament**

J. De Hart, G. W. M. Peters, P. J. G. Schreurs and F. P. T. Baaijens 1079 **A two-dimensional fluid–structure interaction model of the aortic value**
